WORK EXPERIENCE & PROJECTS

IT SPECIALIST

Lear Corporation LPEB 2023 - Present

- Pioneered an enterprise **Chemical Management System** using Palantir Foundry, automating Safety Data Sheet (SDS) workflows for EHS. Resulted in \$1.5M in operational savings within the first year by optimizing chemical approval processes, grant efficient accessibility of chemical information across all sites globally, creating AI agent bot for all forms of reporting, and standardizing the declaration of annual inventory.
- Partnered with a C# ASP.NET web development team to architect and deploy system modules across three separate workstreams, driving efficiency and streamlining the overall development cycle.
- Manages Azure DevOps for the team, responsible for monitoring project repositories.
- Partnered with stakeholders to define project scopes, generate actionable use cases, and prioritize feature backlogs for high-priority development cycles.
- Produced technical documentation (SRS, FRD) and end-user guides, ensuring documentation stayed synchronized with rapid Agile release cycles.

INSTRUCTOR (PART-TIME)

University of Cebu Lapu-Lapu & Mandaue 2024

- Delivers industry-aligned lectures on Software Quality Assurance and Testing methodologies
- Utilized Mind Mapping techniques to teach structured test-case design and requirement traceability, improving student comprehension of complex QA workflows.
- Instructed students on Automated Testing using Selenium, emphasizing framework architecture and script maintenance.

SOFTWARE ENGINEER

NPAX Cebu Corporation 2022 - 2023

- Managed full lifecycle support, including troubleshooting, debugging, and maintenance for multiple client software systems.
- Developed and deployed feature-rich applications for Desktop (C# Windows Forms) and Android platforms (Java).
- Contributed to the design and development of high-scale **ERP, Accounting, and Inventory** modules, improving overall system performance and usability.
- Collaborated with cross-functional teams to gather business requirements and translate them into effective technical solutions.
- Defined, planned, and executed User Acceptance Testing (UAT) processes to ensure product quality prior to release.
- Identified and resolved software defects, significantly enhancing application stability and user satisfaction.
- Maintained comprehensive documentation for system processes, updates, and issue resolution procedures.

WEB DEVELOPER

Mesh Networks Inc.

2019 - 2022

- Designed, developed, and maintained full-stack applications using C# Windows Forms, ASP.NET Core, Android (Java), and MS SQL Server, delivering scalable and efficient business solutions.
- Contributed as part of a development team to **HUMAN HRIS**, improving HR process efficiency by streamlining workflows and reducing manual data entry.
- Independently led the end-to-end development of multiple systems, handling design, development, deployment, and maintenance:
 - **HUMAN Online Recruitment** – Built a customizable recruitment platform that improved recruiter-applicant communication and accelerated hiring workflows.
 - **ORANGE GAMEFOWL** – Developed a web-based system with optimized performance and real-time data handling, enhancing user engagement.
 - **NIMS** (National Integrated Microchip System) – Created an Android-based inventory system for veterinarians, improving tracking accuracy and reducing manual errors.
 - **TRICOINS** – Engineered a mobile Android application for distributed data collection, improving reporting efficiency and data reliability across multiple agents.
- Conducted on-site client meetings, gathered requirements, and presented system solutions, ensuring alignment with business goals.
- Produced detailed user manuals and technical documentation, improving user adoption and reducing support requests.
- Delivered solutions that enhanced operational efficiency, minimized redundant processes, and improved overall system usability.

EDUCATION **Bachelor of Science in Information Technology**
University of Cebu in Lapu-Lapu and Mandaue
2015 - 2019

TECHNICAL SKILLS

PROFESSIONAL

Languages: C#, TypeScript, Java (Android), SQL

Frontend: SCSS, Bootstrap

Frameworks & Technologies: ASP.NET Core, Windows Forms

Platforms & Tools: Palantir Foundry, Android Studio, Visual Studio 2022, Selenium,
Mindmap, Azure DevOps

Databases: MS SQL Server

Version Control: Git

Methodologies: Agile, Scrum

Testing & QA: UAT, Debugging, Troubleshooting
